# Pretty 'n Pink

Think Spring, Think Pink!

Our beautiful new pink lineup starts with a sheer, creamy lipstick in **Precious Pink**.

So soft, so pretty, so my new favorite color. This girl is putting down the nudes and browns for a change.

I'm gonna be pretty 'n pink this season.

Our new gloss in **Tickled** is a high pigmented shade of the perfect shade of pink and I cant decide if I love it more alone or on top of the lipstick. With its all natural ingredients and its subtle vanilla scent—it looks and feels good enough to eat!

Keep it soft, simple, girl next door or add a little drama with a playful cat eye.

Yes, the cat eye is still going strong. How you wear it will determine if you're a kitten or a cat. Meow!

# Radiant 'n Orchid

By now you've heard that Radiant Orchid is the Pantone color of the year. We will be seeing a lot of this color from lips, eyes, nails & clothes.

Our wearable runway take on this trend will have you radiant all year round!

Our new lipstick in **Sweet Pea** is the perfect compliment of the season's biggest shade without being over done. This softly frosted, creamy shade will become a staple in your makeup kit and a favorite in your clients makeup bag year round.

The new natural Lip Gloss in **Wild Orchid** is already a BBK staff favorite.

Add it to the bottom center lip of the Sweet Pea for a little dazzle, but go ahead... be brave, dare to be radiant! and wear it by itself. Surprisingly this bluefish purple delight looked just as good on our fair skinned staffers as it did on our darker, olive skin gals.

We paired this with our Mineral Blush in Precious. A soft, clear pink that adds a touch of innocence. Applied to the apples of cheeks and swept across the eyelid -then finished the look with black liner and mascara. Radiant! Naturally & Organically!
